REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claims are drawn to methods of identifying a human subject as being at risk of obesity or having an increased likelihood of developing obesity by detecting a nucleotide C to T alteration/variant in the TBC1D1 gene, at position 373 of SEQ ID NO: 1, wherein the presence of the alteration/variant is indicative of the subject being at risk of obesity or having an increased likelihood of developing obesity. The claims are allowable over the prior art because the prior art does not teach or fairly suggest an association between this nucleotide alteration/variant and obesity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
